

Dynamic rerouting display system and temporary traffic jam warning systems B10 Godramstein

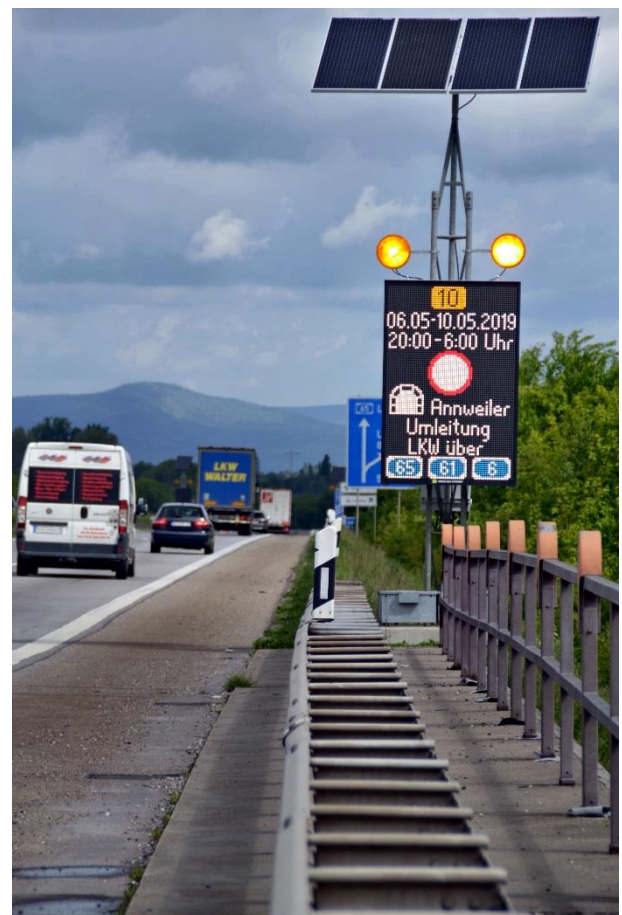

On behalf of the federal state authority „Landesbetrieb Mobilität“ Rhineland-Palatinate Green Way Systems installed several temporary traffic jam warning systems and a dynamic rerouting display system, collaterally to the 4-lane extension of the state road B10 between Godramstein and the motorway A65 near Landau. The systems will be operated likely until October 2019.

Four temporary traffic jam warning systems with a total of 13 display locations and 7 detection cross sections were installed on the neighbouring motorway A65. Eight additional display locations with LED-RGB full matrix signs inform long-range ahead of the construction site about the interference and the rerouting options.

All system components are operated energy self-sufficient via solar energy plants with battery buffering.
